## School Journal : Options

### Option 1: Free School Journals

With this option we supply your school journals free of charge\*. These journals are supported by local business advertising. The advertising is measured, appropriate, family friendly and we will send you a sample of your journal for approval before we go to print. With this option, advertising supports the cost of the design, print and delivery of the journals to the school. Following your application we will be in contact to confirm your order.

\* Note: A surcharge of €1.99 per journal will be applied to schools of greater than 500 pupils.

---

### Option 2: Budget Journals

With this option we supply the journals with a €2.99 charge per journal. This option is available where there is insufficient advertising potential in the area to support the full cost of providing a free journal. For example, your school is in a rural setting or a very large school in a small town. Following your application we will be in contact to confirm your order.

Yours Faithfully

*The Phoenix Journals Team*
